2002 MICHIGAN POVERTY PROFILE

Introduction

The **2002 MICHIGAN POVERTY PROFILE** is composed of estimates of the number of people at selected income levels above and below the 2002 poverty level, cross-referenced by single-years-of-age. These data are based on U.S. and Michigan poverty rate data for 2002 that were released by the Census Bureau in September 2003. Extrapolations from U.S. poverty rates (by age categories) and the overall U.S. and Michigan poverty rates for 2002 were used to develop the Michigan profile. The most recent published Michigan population figures for 2002 (by single-years-of-age) were also used to develop these estimates. The Office of the State Demographer developed those data.

The following examples demonstrate how to use the tables:

Example 1: To determine the total number of people with incomes at or below 100 percent of poverty, refer to the age box at the top or bottom of page 9. The percent of poverty column appears on the left of each page. Where the 100 percent row intersects with the “0-85 + YOA” column, is the number 1,166,635, which is the estimated number of people “0-85+ YOA” with incomes at or below 100 percent of poverty. By then dividing the age population at 100 percent of the poverty level (1,166,635) by the total population (10,250,446), the poverty rate is determined. In this example, the poverty rate is found to be 11.6 percent – the Census Bureau’s published figure for Michigan in 2002.

Example 2: The profile can also be used to determine poverty rate estimates for “age groupings” at any of the income levels shown. For example, on page 2 the total number of children 0 – 17 years-of-age is shown for each income level. By dividing any of the age 0 – 17 income groupings by the cumulative 0 – 17 population, the poverty rate is determined. As shown, the total estimated count of children 0 – 17 years-of-age with incomes at or below 100 percent of the poverty level is 409,680. By dividing that number by the cumulative population of children age 0 – 17 (2,570,264 children), the poverty rate is calculated to be 15.9 percent. Note: By comparison, the poverty rate for all people in the U.S. under age 18 was 16.7 percent in 2002. The Census Bureau does not release States’ child poverty rates in its annual CPS findings.
